Summary

Full-stack developer experienced in building and deploying real-world web applications and client websites using React, Next.js, Node.js, and cloud platforms. Delivered **15+ production-ready business websites** and developed AI-powered applications using RAG architecture and vector search. Skilled in building scalable systems, optimizing performance, and translating business requirements into modern web products.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL
Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3
Backend: FastAPI, Node.js, REST APIs, JWT Authentication, Supabase
AI & Data: RAG Architecture, FAISS Vector Search, Gemini API, LLMs
Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Git, GitHub Actions, Vercel, Netlify
Analytics: Google Analytics 4 (GA4), Lighthouse, SEO Optimization

Experience

Frontend Developer Intern

Feb 2026 – Present

StaffArc (Early-Stage Startup) – Remote

React.js, HTML5, CSS3, JavaScript

- Developed and deployed **14+ production-ready client websites** using React.js with responsive mobile-first UI design.
- Delivered websites for multiple industries including restaurants, interior design firms, consulting companies, and retail businesses.
- **Key projects:** Flow Reach, Sandeep Associates, Bear Harbor, Vintage Times, Parall Forensics, Brent Street Pizza, Naati Dosa, Sathya Interiors, Aikya Spaces, Infinite Metric Limited.
- Optimized UI performance, improved loading speed, and ensured cross-device compatibility across production deployments.

Freelance Web Developer

2025 – Present

Independent Client Projects

React, Next.js, Tailwind CSS

- Designed and deployed **4+ business websites** for restaurants, interior design studios, and service businesses.
- Managed full development lifecycle including UI design, frontend implementation, and deployment.
- Improved website performance using optimized React components and responsive layouts.

Projects

MedRAG — AI Healthcare Diagnosis Copilot | *FastAPI, FAISS, Gemini API, Docker, AWS* 2025

- Built a RAG pipeline over a **4.4 GB FAISS vector index** enabling context-aware medical Q&A with **2–3 second response time**.
- Developed scalable FastAPI backend with **JWT authentication and role-based access control**.
- Optimized FAISS vector retrieval pipeline to improve search accuracy and query performance.
- Containerized the system using **Docker** and deployed cloud-ready infrastructure.

KMCE Cricket Portal — Tournament Management Platform | *React, Supabase, SQL*

2025

- Built a tournament management system supporting **10 teams and 500+ players**.
- Developed responsive dashboards for fixtures, live scores, and leaderboards using React.
- Implemented role-based access for admins, scorers, and viewers.
- Integrated Supabase real-time database for instant score and standings updates.

Education & Achievements

B.Tech – Computer Science Engineering

Expected 2027

Keshav Memorial College of Engineering, Hyderabad

Expected CGPA: 7.0

- Built and deployed **15+ production client websites** during internship and freelance work.
- Developed an AI-powered medical assistant using **RAG architecture and FAISS vector search**.
