Professional Summary

Full Stack Developer and AI Engineer with **1+ year** of professional experience designing, developing, and deploying **15+ production-grade web applications** across restaurant, retail, interior design, and consulting industries. Proficient in **React.js, Next.js, Node.js, FastAPI, and Python** with hands-on experience building AI-powered systems using **RAG (Retrieval-Augmented Generation), FAISS vector search, and large language models (LLMs)**. Experienced with **RESTful API design, JWT authentication, AWS cloud infrastructure, Docker containerization, and CI/CD pipelines**. Proven ability to collaborate with clients, gather requirements, and deliver scalable solutions on schedule. Passionate about clean code, agile development practices, and continuous learning.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Responsive Web Design, Mobile-First UI, Component-Based Architecture

Backend: Node.js, FastAPI, RESTful APIs, GraphQL (basic), JWT Authentication, Role-Based Access Control (RBAC), Supabase

AI & Machine Learning: RAG Architecture, FAISS Vector Search, Large Language Models (LLMs), Gemini API, Prompt Engineering, Vector Databases

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Git, GitHub Actions, CI/CD Pipelines, Vercel, Netlify, Linux

Tools & Practices: Google Analytics 4 (GA4), Lighthouse, SEO Optimization, Agile Development, Cross-Browser Testing, Performance Optimization

Work Experience

StaffArc — Early-Stage Startup

Feb 2026 – Present

Frontend Developer Intern

Remote | React.js, JavaScript, HTML5, CSS3

- Designed and deployed **14 production-ready client websites** using React.js, following mobile-first responsive design principles across **5+ industries** — restaurants, retail, interior design, and consulting.
- Collaborated directly with stakeholders to gather requirements, iterate on UI designs, and deliver final products on schedule for **10 named clients**: Flow Reach, Sandeep Associates, Bear Harbor, Vintage Times, Parall Forensics, Brent Street Pizza, Naati Dosa, Sathya Interiors, Aikya Spaces, and Infinite Metric Ltd.
- Debugged and optimized React component performance, improving page load speed and achieving **100% cross-device and cross-browser compatibility** across all production deployments.
- Participated in agile sprint cycles, providing regular progress updates and adapting to client feedback within tight delivery timelines.

Independent Client Projects

2025 – Present

Freelance Full Stack Developer

Remote | React, Next.js, Tailwind CSS, Node.js

- Led end-to-end development of **4 business websites** — from client communication and UI/UX design through frontend implementation and cloud deployment — for restaurants, interior studios, and service businesses.
- Managed full project lifecycle independently; all **4 projects delivered on schedule** with zero critical post-launch defects, achieving high client satisfaction.

Projects

MedRAG — AI Healthcare Diagnosis Copilot | FastAPI, FAISS, Gemini API, Docker, AWS

2025

- Architected and implemented a production **RAG (Retrieval-Augmented Generation) pipeline** over a **4.4 GB FAISS vector index**, enabling context-aware medical Q&A with average **response latency of 2–3 seconds**.
- Designed a scalable **FastAPI** backend with **JWT authentication** and **role-based access control (RBAC)**, supporting secure concurrent multi-user sessions.
- Containerized the full application using **Docker** and configured **AWS (EC2, S3)** infrastructure for reliable cloud deployment and horizontal scalability.

KMCE Cricket Portal — Tournament Management System | React, Supabase, SQL

2025

- Built a real-time tournament management system supporting **10 teams** and **500+ registered players** with live scoreboards and standings — sole developer across design, development, database, and deployment.
- Integrated **Supabase real-time database** for instant score synchronization and implemented **RBAC** for admin, scorer, and public viewer roles with zero data security incidents post-launch.

Education

Keshav Memorial College of Engineering

Expected May 2027

B.Tech – Computer Science Engineering

Hyderabad, India | CGPA: 7.0 (Expected)

Currently expanding: LangChain, OpenAI API, vector database systems (Pinecone, Weaviate), system design, and data structures & algorithms.
